AI Educational Platform

Adrian Balan www.airl.ro
Adrian Runceanu
Laviniu Gavanescu
Marian-Madalin Neagu

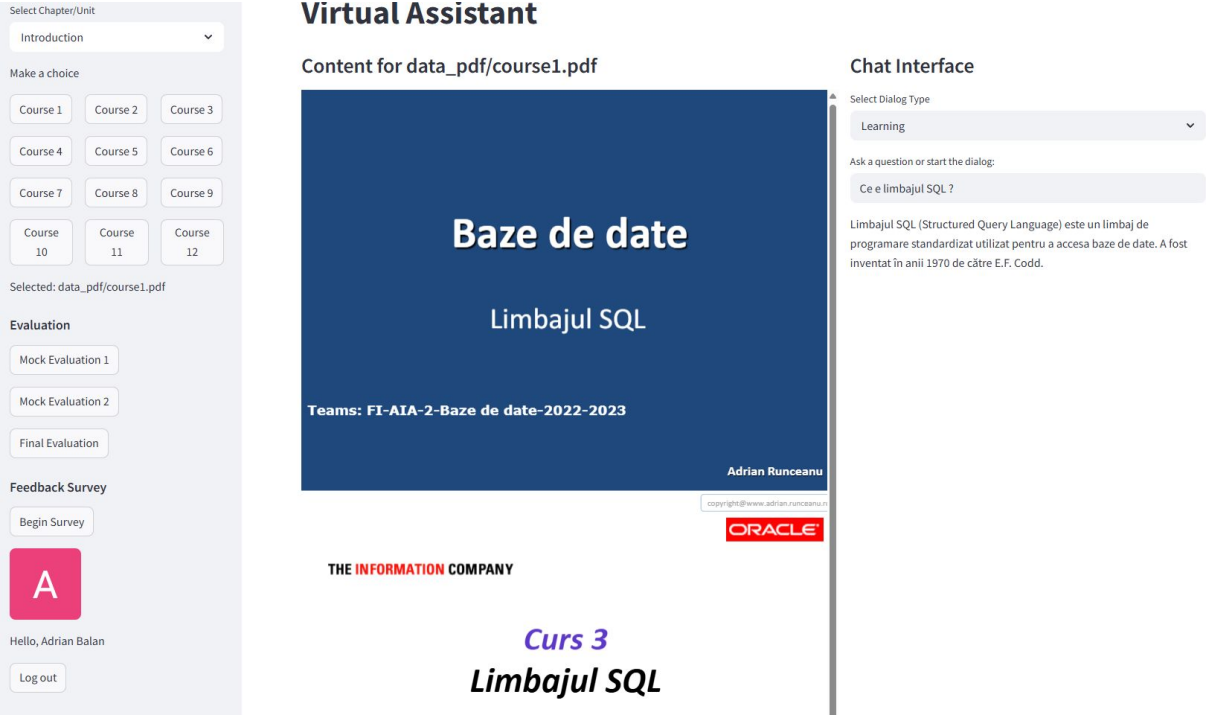
Goal - Migrate standard courses to Online / AI

One-click tool

- Professors upload existing courses (pdfs /paper)
- Courses made available to students online (phone/computer)
- AI Assistant (RAG LLM) answer students questions about the course
- Mock exams generated by AI
- Final exam (and grading) by AI with human verification

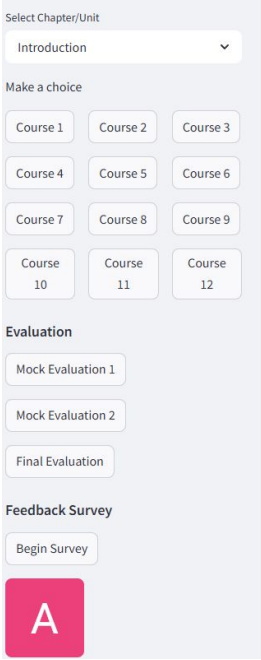
Learning Module

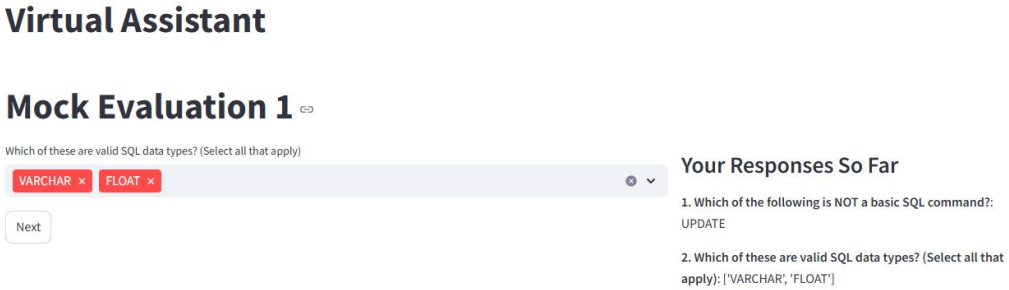
- Online Course
- AI Assistant where you can ask question about the class content./



Evaluation Module

- AI generate exam questions
- Students Answer the questions
- AI give feedback on wrong answers





Mock and Final evaluation modules have the same interface. The Mock evaluation module is also providing instant feedback and recommendations to the student.

Next steps

- Pilot launched at UCB university (Prof Runceanu Adrian)
- Plan to promote to high-schools and universities
- Attract developers community to improve UI and AI
- Attract private companies to provide technical expertise and hosting
